Hello Mark – We added 100 CLP sample numbers, as requested by WESTON. Derrick asked Christy if we could provide additional sample numbers. However, there will be no increase in the number of samples. Please call or send an e-mail, if you have questions.

Take care.

Subject: RE: REVISED - CLP Region 6 Sample IDs, Case Number and container requirements for Wilcox Oil for the week of 5/18/15 - REMOVAL ASSESSMENT - please reply to confirm receipt
Importance: High

Hello Mark - Please delete the previous e-mail and instructions. Please inform the EPA contractor to do the same. The attached files are the revised instructions due to the changes in funding for this sampling event. As per our conversation this afternoon, it was agreed to split the analysis between Remedial and Removal, as suggested by ASB, since it is a collaborative effort. The inorganic analysis would be charged to Removal and the organics would be scheduled as Remedial.

The Case number for the Wilcox Oil site, inorganic analysis, is **45299**.

The turnaround time is 21 days.

Please note the following news/changes/instructions:

- 1) R6 SMO Coordinator, Margaret Jarosz, has a different e-mail address:
mjarosz@csc.com
- 2) Margaret, at this time, does not have a phone number. She can be reached by

e-mail.

- 3) The sampler will e-mail a pdf copy of the **lab** COC to me, after shipping the samples (on the first day of shipping).
- 4) **Tags** - EPA's Houston lab will no longer provide sample tags to EPA Superfund personnel, grantees, contractors, and other agencies that have IAs with EPA Region 6. Also, the Houston lab will end the requirement that samples sent to the Houston lab or to the CLP have a sample tag on each container. This change is only for ending the use of the tie-on, paper (Tyvek) tags. An appropriate label, such as Scribe-generated labels are still required for each container. The information that is required on these labels has not changed. Also, practices for the use of the chain-of-custody forms and custody seals will not change. The EPA SAM/RPM/OSC will determine if a project requires tags and inform the EPA contractor. If you need to use tags for your project, please contact Christy Warren at 281-983-2137 for assistance.
